6WC-DIM FAN AND LIGHT WALL CONTROL

6WC-DIM is a combo fan speed and light kit dimmer wall control that pairs with the KIWI Ceiling Fan LED. Functions include 6-speed motor settings, on/off fan control, on/off LED light kit control, dimming for LED light kit, direction of fan, and on/off control for the power supply (both the fan motor and LED light kit). This control also includes a memory function where the status of the fan speed and direction is saved when the power supply is turned off. When the power supplied is turned on again the previous saved setting is reloaded. The default setting for the LED light kit when turning on the power supply is full brightness.

- Residential
- Commercial
- Hospitality
