## D-300W 300W CONSTANT VOLTAGE LED DRIVER 5 IN 1 DIMMING FUNCTION

D-300W is a versatile 300W 5-in-1 universal dimming Class II driver that accepts 100-277VAC input voltage and provides 24VDC constant voltage output. D-300W delivers flicker free dimming to 0\% on all dimming systems including Triac, 0-10V, 1-10V, PWM, Resistance, MLV, ELV and Incandescent. The high efficiency of the driver and sophisticated overload protection enables the electronics to run cooler and significantly improve reliability while extending product life. The compact metal case is dry/damp location listed and IP65 rated, making it suitable for a wide range of indoor/outdoor architectural, commercial, industrial, and residential lighting applications. D-300W is available with or without integrated junction boxes on both the input and output side that have two knockouts each.

## Note:

1. Unless otherwise specified, all specifications and parameters shall be measured at the input of 230 VAC , rated load and ambient temperature of $25^{\circ} \mathrm{C}$.
2. Accuracy: includes setting error, linear adjustment rate and load adjustment rate.
3. The start time is measured under the starting of the cold machine. Frequent switching on and off may increase the start time
 equipment needs to reconfirm the EMC of the whole device.

## Instructions:

1. This driver should be installed by qualified and professional person;
2. Suitable for indoor use without direct sunlight exposure; Good ventilation are need;
3. Ensure that wiring is correct before test in order to avoid light damage;
4. If driver cannot work normally, don't maintain privately; Have any questions, please contact "Keysun"
