

D-60W-ND 60W CONSTANT VOLTAGE LED DRIVER NON-DIMMING

PROJECT _____ DATE _____

COMMENTS _____

D-60W-ND is a versatile 60W non-dimming Class II driver that accepts 100-277VAC input voltage and provides 24VDC constant voltage output. The high efficiency of the driver and sophisticated over-load protection enables the electronics to run cooler and significantly improve reliability while extending product life. The compact metal case is dry/damp location listed and IP65 rated, making it suitable for a wide range of indoor/outdoor architectural, commercial, industrial, and residential lighting applications. D-60W-ND is available with or without integrated junction boxes on both the input and output side that have two knockouts each.

Note:

1. Unless otherwise specified, all specifications and parameters shall be measured at the input of 230VAC, rated load and ambient temperature of 25°C.
2. Accuracy: includes setting error, linear adjustment rate and load adjustment rate.
3. The start time is measured under the starting of the cold machine. Frequent switching on and off may increase the start time.
4. The driver is regarded as a component used in combination with the terminal equipment. Since the EMC is affected by the whole device, the manufacturer of the terminal equipment needs to reconfirm the EMC of the whole device.
